Atelier sur :

La coordination au sein des systèmes statistiques
nationaux

French Speaking Countries

1a. Quels sont les principaux défis et obstacles à la bonne coordination du système statistique national ?

- *Lack of resources for the coordination of the system, most of the resources are vested in the production*
- *Institutional positioning and authority of the National Statistical Office, lack of “power” of the Chief Statistician; reporting to President and Prime Minister*
- *Statistical coordination is not considered as a priority, silos governmental management*
- *Fragmented system with different reporting lines which does not facilitate the coordination of the system*
- *New statistical domains such as environment statistics, or related to the SDGs and the new data ecosystem (data and actors)*

1b. Quels sont les principaux défis et obstacles à la bonne coordination du système statistique national ?

- *Lack of appropriate legal framework not adapted to the new data ecosystem*

2. D'après votre expérience, quels pourraient être les principaux impacts d'une coordination mal assurée du système statistique national ?

- *Waste of resources, eventually with the risk that many organizations producing the same statistics and indicators (overlap) and sometimes sometimes gap*
- *Weak comparability and consistency of results (quality) produced by the system*
- *Increased burden on respondents and heavy administrative procedures*
- *Trust in the system and the products and services not supporting a culture of evidence-based decision making based on trusted data and statistics*
- *No data sharing between the members of the national statistical system*

3a. Comment pourrions-nous contribuer aux niveaux mondial, régional et national à la coordination des systèmes statistiques nationaux ? Pouvez vous nous faire part d'un ou deux exemples de réussite ?

- *(Mali) repository of metadata and concepts to be used by all producers of official statistics in particular for large surveys*
- *Set-up and reinforcing the role and tasks of the Statistical Council; often not very active*
- *Official statistics branding and certifying*
- *(Mali and Algeria) National and centralized programmes and resource pooling*
- *(Morocco) Constant and wide dialogue between producers and users of statistics; improved statistical literacy of users*

3b. Comment pourrions-nous contribuer aux niveaux mondial, régional et national à la coordination des systèmes statistiques nationaux ? Pouvez vous nous faire part d'un ou deux exemples de réussite ?

- *Regular reviews of the national statistical system; and outcome integrated into the NSDS*
- *Improve the authority and status of the national statistical office and the chief statistician*
- *(Algeria) Embrace international initiatives such as the SDGs and the African Agenda 2063 and reflect this in the national organization and dialogue between the different sectors and the national statistical office (Inter-sectoral Committee)*

3c. Comment pourrions-nous contribuer aux niveaux mondial, régional et national à la coordination des systèmes statistiques nationaux ? Pouvez vous nous faire part d'un ou deux exemples de réussite ?

- *International organizations (Programmes) not designing and implementing capacity building activities through or at least informing the national statistical office*

4. Outre un cadre juridique solide, quelles pourraient être les "recettes" permettant d'améliorer l'intendance des données et de toucher la communauté nationale des données dans son ensemble? Pouvez vous nous faire part d'un ou deux exemples de réussite ?

- *Organized at national level the Word Data Forum: National Data Forum with when relevant specific thematic (to be proposed by international organization)*
- *(Mali) Communication, advocacy and awareness campaigns organized in relation with the national/regional statistics day(s)*
- *Regular dialogue and promotion of official statistics guidelines, concepts, methodology and technology to be used by data ecosystem (interoperability)*
- *Win-Win relationship and understand the need of the private sector*
